DOGS NEED ADVENTURE

Dogs don't just love adventure, they need it. Just like you need to keep them protected. Parastar® Plus for dogs provides fast-acting, long-lasting tick and flea protection, an important step in protecting your pet on every adventure.

Little troublemakers cause big problems.

Ticks are found in most regions of the U.S. Some carry deadly diseases that can be transmitted to your dog.

Flea bites can be painful and sometimes cause allergic reactions.

Parastar Plus for dogs contains two powerful ingredients – cyphenothrin and fipronil – that each have effectiveness to kill ticks, including those that may transmit Lyme disease.

GET POWERFUL PROTECTION WITH PARASTAR PLUS FOR DOGS.

The Benefits of Parastar Plus for dogs

- ⌚ Starts killing ticks and fleas in as little as 5 minutes
- 💰 For powerful tick control, it is an excellent value
- 🕒 Lasts a full **30 days**
- ☔ Is **waterproof** and easy to apply
- ★ Provides **broad-spectrum** tick control

WHEN TICKS BITE, THE CLOCK STARTS TICKING.

- > Ticks carry bacteria that can cause diseases such as Lyme disease and Rocky Mountain spotted fever
- > All tick-borne diseases start with a bite.
- > The time it takes for ticks to transmit disease is variable, but can occur in as little as 3 hours¹
- > The likelihood of disease transmission increases the longer the tick is attached
- > Killing ticks fast can help minimize the risk of disease transmission

DID YOU KNOW?

- > Adult ticks can live up to 3 years without a blood meal²
- > Even when the temperature drops below the freezing point, ticks are still around. Some species come equipped with tick antifreeze to help them survive during the winter³
